

THORENS

TD 124 Transcription Turntable Mounting Template for Pickup Arm

Drawing CB 936

Recommended procedure for installation

1. Remove PL 104 wooden board from turntable by loosening the 3 screws.
2. Place this template on top of PL 104 wooden board (for 12" tone arms) or PLG 104 (an accessory for 16" tone arms).
3. Fix template on wooden board by introducing the 3 screws into the corresponding holes of the template and of the board.
4. Check the mounting instructions of your tone arm for distance D between turntable center and lateral pivot point of arm (mounting center or arm pivot center).
5. For 12" tone arms, follow dot-dash line marked 12" until it cuts the arc corresponding to prescribed distance D. Intermediate distances may be traced between the two nearest arcs. Mark pivot point thus determined with a steel point.
6. For 16" tone arms, proceed in a similar way following dot-dash line marked 16".
7. Check the template furnished with your tone arm or the instructions for pickup base and arm-rest mounting. Mark the corresponding holes around the previously determined pivot point on template and on board.
Caution : see that no hole is located on the metal frame of unit as outlined on template.
8. Remove template and drill the different holes on the board.
